

Rodjerick Courtney

Project Manager Estimator and Scheduler

Mr. Courtney's interest in the construction industry was spurred while taking wood shop and construction method classes at Shakopee High School. After graduating in 2013, Rodjerick, continued his education at Summit Academy OIC as a Pre-Apprentice Carpenter. As a laborer while working with JLM Design and Build Landscape from 2015-2016, Rodjerick gained "hands on" knowledge. The decision to continue his education in construction resulted in a Bachelor of Science degree in Construction Management from Mankato State in the summer of 2017.

As an intern at TRI-Construction Inc. in early 2017, Rodjerick was fully engaged on several projects from early design to final project completion. The skill set and management style resulted into his current role.
